Submission Index — second release

AISD (UFCEP6-0-3) · BPM&EA (UFCEP4-0-3) · Group hospital pathway Repository
https://github.com/Estrella6066773/HW_AISD · prepared 19 October 2026, with A-3, A-4 and B-8 added 20 October 2026 · describes the revised release, tagged submission-2026-10-20; read its SHA from the tag

This file is the entry point to the pack, and its only navigation: it names the releases, gives every artefact's repository path and format, and marks what is not yet in place.

Pack contents

Deliverables by course, each listed in the tables below.

- **AISD**, submissions/AISD/ — A-1 AISD_Presentation_2026-10-19.pptx + .pdf; A-3 AISD_Feedback_Response_Record.pdf + .docx; A-4 AISD_Planning_Evidence.pdf + .docx; 29 September baseline Group_Design_Decisions_2026-09-29.pdf, Group_Acceptance_Test_Plan_and_Results_2026-09-29.pdf, Hospital_All_Processes_Camunda8_Export_2026-09-29.pdf.
- **BPM&EA**, submissions/BPMEA/ — B-1 BPMEA_Abstraction_Note.pdf; B-3/B-4 BPMEA_Written_Evaluation.docx + .pdf; B-5 BPMEA_Operational_Process_Readable_2026-10-19.pdf + BPMEA_Strategic_Process_Readable_2026-10-19.pdf; B-8 Group_Project_and_Test_Plan_2026-10-20.pdf + .docx; 29 September baseline Group_Project_and_Test_Plan_2026-09-29.pdf, Hospital_Pathway_BPMEA_Presentation_2026-09-29.pptx, contribution matrix.docx.

Releases

Tag	Commit	Date	What it identifies
submission-2026-09-29	f6fec99	29 Sep 2026	**Initial release.** Model Hospital_All_Processes_Simple_C8 (Week3 Coursework/hospital-pathway/bpmn/W02_Hospital_All_Processes_Clean_Lines_Camunda8.bpmn); baseline for the 29 September logs.
submission-2026-10-20	the tag target	20 Oct 2026	**Revised release and current state.** Model Hospital_All_Processes_V3_C8 (Week6 Coursework/bpmn/Hospital_All_Processes_V3.bpmn); carries the 19 October acceptance run. Read its SHA from the tag.

standup-1-2026-09-16 and sr3-2026-10-14 are not releases: they mark the first standup and the Sprint Review 3 snapshot. Read the revised release first.

AISD artefacts

ID	Artefact	Repository path	Format and status
A-1	Second-release deck	submissions/AISD/AISD_Presentation_2026-10-19.pptx and .pdf	.pptx + PDF, 13 slides. In place.
A-2	Submission index and repository link	submissions/Submission_Index.pdf and .docx	PDF, 2 pages. In place — this file.
A-3	Feedback response record	submissions/AISD/AISD_Feedback_Response_Record.pdf and .docx	PDF, 9 pages. In place. Twelve rows: seven peer points and five from the group's own review; F-11 kept apart as not implemented, with its residual risk; tutor rows blank.
A-4	Planning evidence	submissions/AISD/AISD_Planning_Evidence.pdf and .docx	PDF, 8 pages. In place. Timeline and plan for both releases, including the 19 October move to V3; task and standup records; SR1 to SR4 reviews; SR3 read back from the increment and SR4 recorded at the 20 October session; a risk register for each release; lessons learned.

The initial-release documents are retained as the 29 September baseline, not as second-release slots: submissions/AISD/Group_Design_Decisions_2026-09-29.pdf, Group_Acceptance_Test_Plan_and_Results_2026-09-29.pdf and Hospital_All_Processes_Camunda8_Export_2026-09-29.pdf.

BPM&EA artefacts

ID	Artefact	Repository path	Format and status
B-1	Strategic model, readable PDF, abstraction note	docs/strategic-bpmn/PB-12_strategic-process_2026-09-29.bpmn; submissions/BPMEA/BPMEA_Strategic_Process_Readable_2026-10-19.pdf; submissions/BPMEA/BPMEA_Abstraction_Note.pdf	.bpmn + PDF 8 pp + PDF 6 pp. In place; second-owner review signed 19 October.

ID	Artefact	Repository path	Format and status
B-2	i* SD and three service SR views	Week6 Coursework/istar/: V1_SD_diagram.txt/.png; PB-16_V1_Admin_SR_reviewed_2026-10-19.txt/.png; PB-16_V1_Clinical_SR_reviewed_2026-10-13.txt/.png; PB-16_V1_Finance_SR_reviewed_2026-10-13.txt and PB-16_V1_Finance_SR_reviewed.png	piStar .txt + PNG, four models and four figures. Ryan reviewed 20 October 2026; nine Admin links corrected and figure re-exported, Finance labels left as drawn (section 12.2).
B-3	Written evaluation, Part 1: requirements alignment	submissions/BPMEA/BPMEA_Written_Evaluation.docx and .pdf	.docx + PDF, 23 pp. In place; Part 1 final.
B-4	Written evaluation, Part 2: acceptance evaluation	Same file	.docx + PDF. Ryan confirmed Part 2 on 20 October 2026; Ruby reviewed 20 October 2026.
B-5	Editable operational model, deployment configuration, two readable exports	Week6 Coursework/bpmn/Hospital_All_Processes_V3.bpmn; Week3 Coursework/hospital-pathway/src/main/resources/application.yaml, config/application.example.yaml; submissions/BPMEA/BPMEA_Operational_Process_Readable_2026-10-19.pdf, BPMEA_Strategic_Process_Readable_2026-10-19.pdf	.bpmn + YAML + PDF 16 pp + PDF 8 pp. In place; review by Ender, 20 October 2026.
B-8	Group project and test plan, second release	submissions/BPMEA/Group_Project_and_Test_Plan_2026-10-20.pdf and .docx	PDF, 9 pages. In place. Six acceptance cases with instance keys; AT-03 FAIL; criteria no case drove are marked NOT EXECUTED.

Carried by the repository, no separate slot: B-6 worker source, pom.xml and configuration (Week3 Coursework/hospital-pathway/, 17 Java files, 19 tests); B-7 the twelve forms in Week6 Coursework/forms/. B-8 is listed in the table above; the 29 September plan is kept beside it.

Contribution evidence

ID	Artefact	Repository path	Format and status
C-1	Contribution matrix, 29 September 2026	submissions/BPMEA/contribution matrix.docx	.docx. A 29 September snapshot: the group's self-reported contribution percentages, and the acceptance-test plan attributed to Ruby. The current contribution record (E-001 to E-053) supersedes it; kept as evidence of that date, not as a current claim.

Acceptance evidence and result

Master record: Week3 Coursework/hospital-pathway/evidence/Camunda_V3_Acceptance_2026-10-19.txt.

The revised model ran on Camunda 8.10.0-alpha5. G07 reached COMPLETED (nine human tasks, no active incident); AT-01, AT-02, AT-04, AT-05 and AT-06 pass; AT-03 **fails**: no candidate groups exist, so a Medical Secretary can still complete the Consultant decision. A clean mvn -B clean test passes 19 tests. Without --disable-connectors the Connectors health check shut c8run down mid-run; the cases were re-run after the restart.

Run instructions

Full sequence: Week3 Coursework/hospital-pathway/README.md.

1. From D:\OneDrive\MyProjects\AISD_Toolbox\tools\c8run-8.10.0-alpha5, run c8run.exe start --disable-connectors. REST, Operate and Tasklist answer on http://localhost:8080 (demo / demo); gRPC on 127.0.0.1:26500.
2. From Week3 Coursework/hospital-pathway, run mvn -B spring-boot:run. It deploys the V3 model and the twelve forms from Week6 Coursework/; sources target Java 21, the recorded run used JDK 23.0.1.
3. Start Hospital_All_Processes_V3_C8 in Tasklist, or run python scripts/pb14_acceptance.py, pb18_acceptance.py or g07_e2e_acceptance.py; CAMUNDA_PROCESS_ID defaults to Hospital_All_Processes_V3_C8.

Week6 Coursework/code/ is a second copy of the Java module, with its pom.xml pointing at ../bpmn and ../forms; run one copy at a time.

Limits recorded, not hidden

- AT-03 fails on both releases; BR-37 is unsupported — no role-based access control, every user task assigned to demo.
- PB-16: reviewed 20 October; Admin links, Finance labels and figure all settled.
- PB-31: confirmed and reviewed, both 20 October 2026.
- B-6: 13 of 17 files reviewed 20 October 2026; four with no recorded author are left unmarked.
- The formal change path, DNA to Finance, urgent authorisation, refund adjustment and letter escalation are modelled but no case drives them.
- The contribution record (E-001 to E-053, Ender's review) and the Definition of Done (four-member sign-off, 28 of 31 ticked) are both dated 20 October.
